## PROFILE

Tatiana G. Lopes

Fashion Technical Designer | Remote Collaboration | CAD & 3D Specialist

I'm a highly driven and versatile fashion design professional based in Boston, MA, with a BFA in Fashion Design & Business Merchandising from UMass Dartmouth. With 3+ years of industry experience, I specialize in technical design, CAD work using Gerber, 3D garment simulation with CLO 3D, and digital design through Adobe Illustrator, Photoshop, and InDesign.

I have hands-on experience creating detailed tech packs, communicating with domestic and overseas manufacturers, managing fittings, and driving designs from concept to production. I bring a unique blend of design, illustration, and modeling experience, which enhances my ability to understand fit, form, and presentation.

Having worked remotely in both creative and customer-facing roles—including with D2G Group in Fall River—I'm confident in managing virtual workflows, cross-functional communication, and remote production timelines. Passionate about innovation, inclusivity, and bold design, I'm eager to collaborate with teams pushing fashion forward
